PROFILE

Persistent AI and Data Science professional applying solutions to CyberSecurity data challenges, solving complex problems and contributing to impactful real-world projects.

EXPERIENCE

AI and CyberSecurity Intern - SQ1 Security Private Limited June 2025 – Nov 2025

Vulnerability Detection Product

- RAG-based pipeline to analyze software vulnerabilities and generate contextual security insights.
- Embedding-based semantic retrieval to understand CVE patterns and automatically patches.

Policy Management Tool

- System to analyze informations and classify organizational policies and compliance types.
- Semantic embeddings to automatically categorize and maintain structured policy repositories.

OCR-to-LLM Pipeline

- Fine-tuned a Biomedical NER model to extract diagnosis entities from clinical documents.
- Built a RAG pipeline to map extracted entities to ICD diagnosis codes.

MCP Server Integration

- Built MCP server integrations to orchestrate multiple AI tools through a unified LLM interface.

PROJECTS

- **EDGE EXTENSION - MODEL DEVIATION SUMMARIZER (2026)** Repo Link
 - Developed a system to detect output drift and deviation in LLM conversations.
 - Designed vector alignment techniques for prompt evaluation and correction.
 - Generated optimized expert prompts to enhance consistency and reduce hallucinations.
- **AI-DRIVEN-ZERODAY-SOC-MONITORING-TOOL (2025)** Repo Link
 - Built AI-powered analytic agents for log and event analysis in SOC environments.
 - Integrated semantic inference to generate threat insights and security alerts.
 - Applied context-aware models to detect zero-day and emerging threats.
- **AI-PERSONALIZED-MAIL-COMPOSER (2025)** Repo Link
 - Created a pipeline to learn email style for personalized generation.
 - Used semantic adaptation for context and tone per user preferences.
 - Built a Streamlit UI supporting draft previews and guided composition.
- **PROMPTMASKER (2025)** PyPI Link
 - Python package to detect and mask sensitive data before sending prompts to LLMs.
 - Uses heuristic-based redaction for privacy protection (not encryption-focused).

EDUCATION

M.Sc. Artificial Intelligence and Machine Learning (Integrated)	2022 – Present
Coimbatore Institute of Technology, Coimbatore	CGPA: 8.63 (Till 7th Semester)
Higher Secondary Education (HSC)	2021 – 2022
Mahendra Matric Hr Sec School, Namakkal	Percentage: 89.4

ACHIEVEMENTS

- **2024** - First Prize at **TechStars Startup Weekend Sustainability**.
- **2024** - First Place, **Impairathon** hackathon (360+ teams) by **StartupTN**.
- **2025** - Finalist, **Shaastra Programming Contest 2025** (IIT Madras).

TECHNICAL SKILLS

AI Technologies: Model Finetuning, NLP, RAG, MCP, Agentic-AI, A2A Protocol.
Big Data & Analytics Tools: Debezium, Kafka, ZooKeeper, PowerBI.
Cloud, Containerization & Version Control: Docker, AWS, Git.
Programming Languages: Python.
Database: Firebase, MySQL, PostgreSQL.
Soft Skills: Adaptability, Team Collaboration, Communication.
